RECENT AND UPCOMING ENGINEERING MANPOWER COMMISSION PUBLICATIONS

Note: all EMC surveys are now available in the form of machine-readable media. For more information, contact the AAES Publications Department at the address below.

ENGINEERS' SALARIES: SPECIAL INDUSTRY REPORT 1989 (forthcoming in July, 1989)

A detailed breakdown of engineering salaries according to type of industry, geographic regions, company size, employee experience, highest degree held, and supervisory status. Tables and graphs depict salaries in medians, quartiles, deciles and means.

member price: $169.00 non-member price: $287.50

PROFESSIONAL INCOME OF ENGINEERS 1988 (forthcoming in July, 1989)

An abridged version of the *Special Industry Report*. Details for salary differences by highest degree held are not included; tabulations are added on engineering compensation in local, state and federal government agencies.

member price: $59.50 non-member price: $97.00

SALARIES OF ENGINEERS IN EDUCATION 1988

Median, quartile, decile and mean salaries across 18 experience brackets for engineering faculty, by academic rank, contract types, and type of institution.

member price: $70.00 non-member price: $112.00

ENGINEERING AND TECHNOLOGY ENROLLMENTS, FALL 1988

A two-volume overview of the enrollment of students in engineering and engineering technology programs throughout the United States. Details by fields of study for specific schools and states, with added tabulations for women, minorities, and foreign nationals.

Complete set: member price: $120.00 non-member price $195.00

Separate volumes:

Part I: Engineering Enrollments: member price: $70.00 non-member price: $115.00

Part II: Technology Enrollments: member price: $70.00 non-member price: $115.00

ENGINEERING AND TECHNOLOGY DEGREES, 1988

A comprehensive report on recent engineering and engineering technology degrees in three volumes. Part I provides general statistics for schools and states on degrees in 40 engineering and technology disciplines. Part II provides similar data for awards to women, minorities, and foreign nationals. Part III includes detailed data for specific curricula.

Complete Set: member price: $140 non-member price: $230.00

Separate volumes:

Part I: by School: member price: $55.00 non-member price: $89.00

Part II: Minorities: member price: $75.00 non-member price: $115.00

Part III: by Curriculum: member price: $55.00 non-member price: $89.00

ENGINEERING MANPOWER BULLETINS

Concise, timely information on trends in engineering salaries, enrollments, degrees, women and minorities in engineering, other topics.

Full subscription year: member price: $66.00 non-member price: $110.00

Single copies: member price: $9.00 non-member price: $12.00

TO ORDER: Member prices are available to members of AAES member societies, employees of Industry Affiliates, and firms/educational institutions that have participated in the study to be purchased. Please include society affiliation and membership number, Industry Affiliate, or survey participant information with your order, if applicable. First class postage (U.S. domestic) is included in the purchase price. Foreign orders add 10%; check must be payable in U.S. funds. Prepayment required; pro forma invoices provided on request. Orders should be directed to the AAES Publications Department, 415 Second St. NE, Washington, D.C. 20002.

RECENT AND UPCOMING ENGINEERING MANPOWER COMMISSION PUBLICATIONS

ENGINEERS' SALARIES: SPECIAL INDUSTRY REPORT 1988 (available in September)

A detailed breakdown of engineering salaries according to type of industry, geographic regions, company size, employee experience, highest degree held, and supervisory status. Tables and graphs depict salaries in medians, quartiles, deciles and means.

member price: $167.00 non-member price: $287.50

PROFESSIONAL INCOME OF ENGINEERS 1988 (available in September)

An abridged version of the *Special Industry Report*. Details for salary differences by highest degree held are not included; tabulations are added on engineering compensation in local, state and federal government agencies.

member price: $59.50 non-member price: $97.00

SALARIES OF ENGINEERS IN EDUCATION 1988 (available in September)

Median, quartile, decile and mean salaries across 18 experience brackets for engineering faculty, by academic rank, contract types, and type of institution.

member price: $70.00 non-member price: $112.00

ENGINEERING AND TECHNOLOGY ENROLLMENTS, FALL 1987

A two-volume overview of the enrollment of students in engineering and engineering technology programs throughout the United States. Details by fields of study for specific schools and states, with added tabulations for women, minorities, and foreign nationals.

Complete set: member price: $120.00 non-member price $195.00

Separate volumes:

Part I: Engineering Enrollments: member price: $70.00 non-member price: $115.00

Part II: Technology Enrollments: member price: $70.00 non-member price: $115.00

ENGINEERING AND TECHNOLOGY DEGREES, 1987

A comprehensive report on recent engineering and engineering technology degrees in three volumes. Part I provides general statistics for schools and states on degrees in 40 engineering and technology disciplines. Part II provides similar data for awards to women, minorities, and foreign nationals. Part III includes detailed data for specific curricula.

Complete Set: member price: $140.00 non-member price: $230.00

Separate volumes:

Part I: by School: member price: $55.00 non-member price: $89.00

Part II: Minorities: member price: $75.00 non-member price: $115.00

Part III: by Curriculum: member price: $55.00 non-member price: $89.00

ENGINEERING MANPOWER BULLETINS

Concise, timely information on trends in engineering salaries, enrollments, degrees, women and minorities in engineering, other topics.

1989 subscription year, eight issues: member price: $66.00 non-member price: $110.00

Single copies: member price: $9.00 non-member price: $12.00

TO ORDER: Member prices are available to members of AAES member societies, employees of Industry Affiliates, and firms/educational institutions that have participated in the study to be purchased. Please include society affiliation and membership number, Industry Affiliate, or survey participant information with your order, if applicable. First class postage (U.S. domestic) is included in the purchase price. Foreign orders add 10%; check must be payable in U.S. funds. Prepayment required; pro forma invoices provided on request. Orders should be directed to the AAES Publications Department, 415 Second St. NE, Washington, D.C. 20002.

AMERICAN ASSOCIATION OF ENGINEERING SOCIETIES

The American Association of Engineering Societies (AAES) is a multidisciplinary organization dedicated to advancing the knowledge, understanding and practice of engineering in the public interest. Its members represent the mainstream of U.S. engineering—over half a million engineers in industry, government, and education.

Through its councils, commissions and committees, AAES addresses questions relating to the engineering profession; assesses public policy issues affecting engineering, technological innovation and national goals; conducts surveys of engineering personnel; represents the U.S. engineering community internationally in such bodies as the World Federation of Engineering Organizations and the Pan American Union of Engineering Associations; undertakes special projects such as national inventors' workshops and major studies of the utilization of American engineers; issues statistical studies of the engineering workforce, present and future; and publishes reference works such as *Who's Who in Engineering* and the *Thesaurus of Engineering and Scientific Terms.*

AAES also conducts forums for leaders in engineering, industry, government and education for the discussion of issues affecting engineering and the public interest. These include annual leadership conferences, workshops on technology forecasting and assessment, public policy roundtables, and engineering executive forums.

ENGINEERING MANPOWER COMMISSION

The Engineering Manpower Commission (EMC) has been a source of objective, timely data on questions relating to the supply and demand for technological personnel since its organization in 1950. As an AAES Commission, EMC is composed of volunteers from professional engineering societies, academia, government, and industry, supported by a professional staff headed by AAES' Director of Manpower Studies.

EMC conducts annual surveys of industry and schools of engineering, monitors trends in the supply of and demand for engineers, and produces annual reports on engineering enrollments, degrees, and salaries. In addition to its statistical studies, EMC also produces the *Engineering Manpower Bulletin,* which assesses trends in the engineering workforce including participation in the profession by women and ethnic minorities.

1989 Officers

INTRODUCTION TO VOLUME I

This is the 21st annual report from the Engineering Manpower Commission (EMC) on enrollments in engineering and engineering technology in the United States. Volume I of the study covers engineering; Volume II covers engineering technology. All data are for enrollment as of Fall, 1988.

Volume I provides detailed data on enrollment in engineering programs for all students and for women, Blacks, Hispanics, Asian Americans, American Indians, and foreign nationals. Enrollment is tabulated by the year in school--first year, second year, etc.--for full-time undergraduates, and by the type of degree sought--master's, professional engineering, or doctorate--for full-time graduate students. Part-time students are tabulated separately at the undergraduate and graduate levels, irrespective of their year in school or of the type of advanced degree they are seeking. Note that schools showing no data for particular full-time students may still have such students attending part-time. Two basic types of tabulations are provided, in addition to summary tables. The first summarizes overall enrollment, across all curricula, for each school covered in this report. Schools are listed alphabetically within states; state subtotals and grand totals are included. These data provide basic institutional and geographic measures of participation in engineering programs.

The second general type of tabulation provides detailed enrollment data for each engineering program offered by these schools. Programs are listed within some twenty broad engineering disciplines (e.g., chemical, civil, etc.); disciplinary subtotals are provided both within these listings and in separate summary tables. Within each broad discipline, programs are listed alphabetically by their detailed titles, within schools and states, thus preserving such distinctions as the differences between programs in general civil engineering, surveying engineering, and transportation engineering. Using these tables, readers can obtain information on enrollment in specialized fields of engineering that are not isolated in the broader disciplinary groups, such as manufacturing engineering.

Like EMC's surveys of enrollments for 1986 and 1987, all tabulations in this report draw on a master data base on engineering programs, in order to provide accurate, consistent descriptive data. EMC's educational surveys also use the data base to generate the survey forms used to obtain these statistics. Participating institutions receive laser-generated questionnaires that include the specific programs and other descriptive data applicable to a particular engineering school. This simplifies data entry for all parties and improves the consistency and accuracy of the work.

Once again, institutions have been added to the study, to keep it as comprehensive as possible. This report covers 320 schools with engineering programs. Engineering enrollments are reported here for the first time for Embry-Riddle Aero University's Prescott, Arizona campus; for Mercer University in Georgia; for the Wentworth Institute of Technology in Massachusetts; for the College of St. Thomas in Minnesota; and for the University of Wisconsin at Parkside. The University of Tennessee at Martin has been dropped from coverage, as its programs are restricted to pre-engineering only. In addition, Baylor University in Texas is known to offer engineering programs but has not yet participated in EMC enrollment surveys. In other changes from the previous report, the Georgia Institute of Technology is now reporting enrollment data for co-op students on work assignments (these had been left out of reports for this school in the past), and the Computer Science Department at North Carolina State became a part of the school's College of Engineering in August, 1988; in both cases, the added enrollment stems from technical changes in reporting rather than actual growth in engineering.

Major efforts are made in these studies to obtain full cooperation from participating institutions. In addition, when partial responses are possible--for example, some schools cannot report the numbers of women who are enrolled in each specific combination of engineering program and year in school, but can report how many women are enrolled in each program, overall--then the overall data is pro-rated to generate reasonable approximations for data entry. As a result of these steps, the incidence of missing information in EMC's educational surveys has been greatly reduced. Consequently, these studies no longer use the estimates of missing data that appeared in our reports on enrollments and degrees before 1986. In addition, detailed codes are employed to report the precise adjustments used to deal with every response (see the description of the "T-A-R" codes, below).

Detailed commentary on the results of the survey of Fall, 1988 engineering enrollments will be issued simultaneously with these reports in issue No. 95 of EMC's *Engineering Manpower Bulletin.* We will take note of the following outcomes, however. As expected, overall full-time undergraduate enrollment continued to decline, by 3.0 percent compared to 1987. Freshman enrollment increased slightly, but we believe that this will turn out to be a one-time phenomenon; we expect by the Fall of 1989, freshmen engineering enrollments will resume the downward trend they have exhibited since 1983. Freshman enrollments of women and all of the ethnic minorities tracked by EMC also improved in 1988; the increase for Black freshmen was especially significant and reflected significant growth at most of the traditionally Black engineering colleges in the United States.

The Engineering Manpower Commission has been reviewing the contents and format of its education surveys for the last several years and is contemplating extensive changes in the packaging of its enrollment surveys in the near future.

Any questions regarding the course content or other details of specific engineering programs should be directed to the participating schools. Other inquiries about EMC's educational surveys are welcome. Contact R. A. Ellis, Director of Manpower Studies, American Association of Engineering Societies. EMC can provide these data in the form of machine-readable media. For prices and ordering information, see the inside back cover.

COVERAGE AND RESPONSE

In engineering, the 1988 enrollment study covers 320 institutions, including all of those with curricula approved by the Accreditation Board for Engineering and Technology (ABET). Some of these programs are newly initiated and have not been included in previous reports from EMC. These listings provide a comprehensive enumeration of enrollment in engineering programs available in the United States today. In counting institutions, EMC abides by local preferences in deciding whether or not to count a school's branches as separate entities. Thus all of the various locations of the Pennsylvania State University are counted as a single institution, while in other cases (for example, Purdue and the University of Texas), different branches are treated as separate schools. This treatment is a continuation of EMC's traditional practices.

As in the past, data for some institutions were obtained by substituting an earlier response for missing reports. Substitutions are permitted because problems caused principally by personnel turnover make it unreasonable to expect complete participation every year by every school. In a change from previous EMC practice that was first adopted in 1987, we are now using responses for any previous year rather than drop a school from coverage. The older substitutions are used only when extended efforts have failed to yield a current response; schools handled in this fashion for the 1988 survey are identified below in the detailed explanation of response codes. In a number of cases, the substituted data applies only to a portion of an institution's response; for example, undergraduate data may have been covered with a fresh 1988 response, while graduate programs were handled with older data. All substitutions are identified in the body of the report by appropriate "T-A-R" codes (see below). The extent of substitution has been substantially reduced by EMC's ongoing efforts to work for a comprehensive response to each of its surveys.

ERROR CHECKING

Thorough efforts were made to eliminate errors in these statistics. Literal comparisons between original data and key entries were carried out. Totals for every combination of enrollment level and school were checked against original questionnaires. Results for each school were compared with reports for previous years, to check for questionable shifts in the results from one year to the next, or missing information on particular programs. Instances of both sorts of problems were found and fixed; in some cases, reporting errors on the part of participating institutions were identified, while in others some significant shifts in patterns of engineering enrollment were confirmed.

Program-level ABET accreditation codes were checked and updated for this study. Corrections were also made in institutional-level school type and accreditation codes used by EMC. Note that EMC's program-level accreditation codes reflect only ABET certifications, and do not allow for program-level approvals from the new accreditation board for computer and information science.

EXPLANATION OF SYMBOLS AND ABBREVIATIONS

The "T-A-R" Codes:

The enrollment survey uses a three-position alphabetical coding system to denote school types, institutional-level

TEN YEAR SUMMARY OF FALL ENGINEERING ENROLLMENTS, 1979-1988:

ABET	239	246	250	249	258	258	264	270	277	281

accreditation, and (if applicable) special conditions that explain a school's response to the survey. These codes are constructed as follows:

T: Type of School:

"S" means state or other public control, including municipally-sponsored schools, but excluding the federal service academies.

"F" denotes the federally-sponsored schools.

"N" means non-sectarian, non-profit private institutions.

"R" denotes religiously affiliated private institutions.

"P" denotes proprietary schools.

A: Accreditation:

"E" means at least one engineering program is accredited by ABET.

"T" means that at least one technology program is accredited by ABET.

"B" means that the school has ABET-approved courses in both engineering and technology.

"R" means the school does not have ABET-accredited courses but is approved at the institutional level by regional accreditation agencies like the Southern Association of Colleges and Schools.

"X" means none of the preceding codes apply.

R: Response:

These codes appear only when applicable; they are not necessarily identical to the similar codes used in the survey of 1987 enrollment. Codes are listed here in alphabetical order; however, they were assigned as needed, not necessarily in alphabetic order, so the ordering is not significant.

"A" means all details (women, minorities, and foreign nationals enrolled in engineering programs) are missing from the response. There may be such students at the school but they will not show up in the tabulations for the specific population groups. The numbers for all enrolled students are not affected.

"B" is similar to "A," except that details were provided for women only; details for minorities and for foreign nationals were not provided.

"C" is similar to "A," except that details were provided for women and minorities only; details for foreign nationals were not provided.

"D" is similar to "A," except that details were provided for minority groups and foreign nationals only; details for women were not provided.

"E" is similar to "A," except that details were provided for women, some of the minority groups, and foreign nationals; details for other minority groups were missing.

"F" is similar to "A," except that details were provided for women and foreign nationals only; details for the minority groups were not provided.

"I" means that part-time enrollment was not separated out from full-time enrollment.

"J" means that part-time enrollment was not separated out from full-time enrollment for some detailed breakdowns.

"K" means that part-time enrollment was not separated out from full-time enrollment for some details, and in addition, some or all minority data were missing altogether.

"P" means that some data were developed by EMC, by pro-rating accurate aggregates (such as information on all female enrollment) among the various programs at a school.

"Q" means that some data were pro-rated by EMC, and in addition other data were missing altogether.

"7" denotes a substituted response using data originally submitted for Fall, 1987. Six schools were treated with these data. In the cases of two of these schools, all details were also missing: at the New York Institute of Technology, and at Syracuse University.

"6" denotes a substituted response using data originally submitted for Fall, 1986. Four schools were treated with these older data: the University of New Haven in Connecticut; Valparaiso University in Indiana; the Stevens Institute of Technology in New Jersey; and the Chattanooga campus of the University of Tennessee (in the case of this last school, a 1987 response had been received by EMC, too late for use in that survey; this response was not used for the substitution because it provided only total enrollment by program and totals for women, lacking all details for year in school, part-time vs. full-time enrollment, minorities, and foreign nationals).

"5" denotes a substituted response using data originally submitted for Fall, 1985. Two schools were treated with these data: the University of Hartford in Connecticut, and St. Mary's University in Texas.

Examples: "TAR" code of SB: this is a publicly supported school with ABET-approved programs in both engineering and engineering technology. "TAR" code of RR7: this is a religious-affiliated school, regionally accredited, which has been handled with a substituted 1987 response. "TAR" code of NEB: this is a private, non-sectarian school with ABET-accredited engineering programs and missing details for minorities and foreign nationals.

Program-Level Accreditation Codes:

These are used only in the tabulations for specific curricula:

"B" denotes ABET accreditation for the program at the bachelor's level.

"M" denotes ABET accreditation at the master's level (now only rarely used for programs with no

B.S. equivalent).

"A" denotes ABET accreditation at the associate degree level.

"N" denotes programs with no ABET accreditation. In general, where program titles match across degree levels, higher-level offerings will be flagged with the corresponding lower-level code if such an ABET certification exists. However, many situations exist where this rule cannot be unambiguously applied. For example, we have generally labeled master's level programs in engineering mechanics as "N" for "no ABET accreditation" even when an ABET-approved BS curriculum in mechanical engineering is offered. If an undergraduate program in engineering mechanics as such existed, then a "B" code would have been used for any corresponding higher-level program. In general, ABET does not attempt to accredit graduate programs, and codes at this level (other than the rare "M" designations) are meant only to denote the existence in an institution of an ABET-approved undergraduate course with an identical designation. This approach has been used for years in EMC educational surveys.

Engineering Discipline Category Abbreviations:

AER = Aerospace and Related
AGR = Agricultural
ARC = Architectural
BIO = Bioengineering
CER = Ceramics
CHE = Chemical
CVL = Civil and Construction
CMP = Computer
ELC = Electrical and Electronic
ENS = Engineering Science
ENV = Environmental
GNL = General Engineering
INM = Industrial/Manufacturing/Engineering Management
MAR = Marine
MTL = Materials and Metallurgical
MEC = Mechanical
MGN = Mining/Mineral/Geological
NUC = Nuclear
PET = Petroleum and Natural Gas
SYS = Systems
OTH = Others
PRE = Undeclared majors, or other "freshman engineering" students

DEFINITIONS AND OTHER MISCELLANEOUS NOTES

First-year enrollments are incompletely covered in these surveys, for a variety of reasons, including the fact that at many schools freshmen cannot declare a major field. The under-enumeration is consistent from one year to the next, so EMC's freshman time series data are reliable as an indicator of trends, even though they fall considerably short of a total enumeration.

In 1987, EMC stopped covering enrollment in pre-engineering or other two-year transfer programs in community or junior colleges; it also dropped coverage of "3-2" transfer programs in four-year colleges that not do have their own engineering degrees. Previously, a limited amount of data on such enrollments were obtained in these surveys and reported along with engineering technology data in Volume II. Treatment of these types of curricula was dropped because EMC covered only a small fraction of the enrollments in such programs and does not have the resources to survey the several hundred additional schools that would need to be covered in order to do an adequate job.

Counts of women reported by EMC include some foreign nationals. Counts of ethnic minorities are limited to U.S. citizens or other permanent residents. "Foreign Nationals" are defined as students in the United States on F-1 (student) or J-1 (exchange) visas, and do not count people who are immigrants or other permanent residents.
